(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We propose to shut subject well in as follows:

1. Capacity of well is less than one bbl oil per day which is uneconomical to produce.
2. No remedial prospect exists.
3. Well is a multiple tubingless completion; therefore the casing string could possibly be used in the future if the adjacent producing casing string should be junked for some unforeseen reason.
4. We plan to shut subject well in as uneconomical to produce until there is no chance the casing string will be needed in the future. This proposal subject to approval of the United States Department of the Interior Geological Survey.

18. I hereby certify that the foregoing is true and correct
