13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

The subject well was temporarily abandoned in December, 1996 (CIBP set @ 5130' x capped with 35' cement x pressure tested). The well is believed to have recompletion potential in several reservoirs and a study is currently underway with regards to recovering additional reserves in the Paddock, Queen, and Seven Rivers. The study should be concluded this year, and recompletion efforts would commence in 2000. As such, we respectfully request continuation of TxA Status for another year.
