Re: **Administrative Approval for
Nonstandard Proration Unit &
Unorthodox Well Location
A. B. Coates "C" #27
Justis Glorieta gas pool
SE/4 & NE/4 SW/4 of section 24
T-25S, R-37E; Lea County, New Mexico**

Dear Mr. LeMay,

Texaco Exploration and Production Inc. respectfully requests administrative approval to form a non-standard 200 acre proration unit consisting of the above captioned acreage underlying the A. B. Coates "C" #27. Also, due to the location of the well within the proration unit, Texaco requests administrative approval for an unorthodox well location. The Subject well is located in Unit Letter K, Section 24, Township 25S, and Range 37E, Lea County.

The A. B. Coates "C" #27 was spudded 7/25/65, and completed in the Justis Blinbry interval. This zone was produced until 1/1/93 when it became uneconomical to continue production and consequently shut-in. At this time, Texaco intends to plug back (and abandon) the current Blinbry completion, recompleat uphole in the Glorieta gas pool, and return the subject the idle wellbore to production.

Attached are forms C-102 (NMOCD) and 3160-5 (BLM) detailing the above proposal. Also attached is a plat designating the offset operators surrounding the subject non-standard acreage.

Texaco believes approval of this proposal will be in the interest of conservation, will protect correlative rights, and will allow for a more complete recovery of Glorieta gas reserves from the subject acreage.

Texaco has notified offset operators of this application by copy of this application package sent by certified mail. If you need additional information concerning this matter, please contact me at (505) 397-0426. Thank you for your consideration of this proposal.

Sincerely,

Darrell J. Carriger
Engineering Assistant

TYPE OF ACTION

- ☐ Abandonment
☐ Recompletion
☐ Plugging Back
☐ Casing Repair
☐ Altering Casing
☒ OTHER: recomplete to Glorieta
☐ Change of Plans
☐ New Construction
☐ Non-Routine Fracturing
☐ Water Shut-Off
☐ Conversion to Injection
☐ Dispose Water

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log Form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

The recompletion described below has been previously approved by the BLM (5/17/95). Due to workover priority, the work has not yet been performed. Texaco requests that the subject well remain shut-in for 90 days until the appropriate paperwork can be filed (i.e. application for non-standard proration unit and unorthodox well location).

Objective: Texaco intends to plug back the subject well out of the Blinebry zone and recomplete uphole to the Glorieta.

1. TIH with bit and clean out to PBTD.
2. Set CIBP @ 4870' and cap with 35' cement.
3. Perforate Glorieta zone on interval 4688'-4730' with 2 jspf.
4. Acid stimulate Glorieta perforations.
5. Flow well back.
6. Test.
7. Return to production.

14. I hereby certify that the foregoing is true and correct
