SUBSEQUENT REPORT OF:

REPAIRING WELL ☐ALTERING CASING ☐ABANDONMENT* ☐(Other) Plug back and test separate zones ☒ (NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

The objective zones were tested and found to be non-commercial. It is proposed to plug back to 4620' and to leave the hole available for testing the San Andres and Seven Rivers sands. We propose to set cement plugs as follows:

- (1) 12,950' - 13,050' W/41 sx Class E Cement
- (2) 11,250' - 11,350' W/51 sx Class E Cement
- (3) 10,180' - 10,280' W/51 sx Class E Cement
- (4) 8,450 - 8,550' W/51 sx Class E Cement
- (5) 4,620 - 4,720' W/51 sx Class E Cement

The intervals between the plugs are to be filled with mud. Verbal approval of the above proposed procedure was received from Mr. Brown on 3-23-65.

18. I hereby certify that the foregoing is true and correct
