ATTN: Mr. Leslie A. Clements

Dear Mr. Clements:

Attached is the procedure for additional testing of the oil flow on the surface casing of Tenneco's R.L. Mosley #1. The test should determine whether this was an accumulation over a period of time, or direct communication that will require additional action.

Mr. Herman Pharr will contact you when we are ready to begin the test. If you have questions on the outlined procedure, please contact Mr. Dale L. Leavitt, (303) 292-9920.

Very truly yours,

TENNECO OIL COMPANY
