Instructions

General: This form is designed for submitting proposals to perform design and well operations, and reports of such operations when completed, on Federal and Indian lands pursuant to applicable Federal law and regulations, and if approved or accepted by any State, or all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian lands should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 5: Proposals to abandon a well and subsequent operations should include special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid content not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above the cement plugs; amount, size, method of parting of any casing, liner or tubing pulled; and the depth to top of any left in the hole; method of closing top of well; and date well site conditions for final inspection looking to approval of the abandonment.

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Include in this section a description of the proposed work. If well is directionally drilled, give azimuth, bearing, and depth of each well. If well is to be abandoned, give depth of casing, liner, or tubing pulled, and depth to top of any left in the hole. If well is to be repaired, give details of repair work.)

18. If the well is to be abandoned, include in this section a description of the proposed work. If well is directionally drilled, give azimuth, bearing, and depth of each well. If well is to be abandoned, give depth of casing, liner, or tubing pulled, and depth to top of any left in the hole. If well is to be repaired, give details of repair work.
