Proration Unit  
Langlie-Jal Federal No. 1  
NE/4 NE/4 Section 8

Lea County, New Mexico

Gentlemen:

On December 14, 1976, I was granted a farmout by El Paso Natural Gas Company covering the Jalmat Gas rights in the NE/4 Section 8, T-25-S, R-37-E, Lea County, New Mexico and I propose to drill a 3300-feet Seven Rivers test in the NE/4 NE/4 Section 8.

Since Union Texas Petroleum's Langlie Jal Unit No. 74 is located 660' FNL and 660' FEL Section 8, it will be impossible to locate a new in the center of Unit-A of Section 8. In addition, UTP has existing water injection lines and production gathering lines located both south and west of their LJU No. 74. Therefore, in order to avoid the existing surface obstructions and to minimize any possible subsurface contamination, I am requesting that the NMOCC approve a non-standard Jalmat Gas location for my Langlie-Jal Federal No. 1. I propose to locate the subject well 330' FNL and 330' FEL of Section 8.

Furthermore, I am also requesting approval from the NMOCC at this time for a 160-acre non-standard gas spacing unit for my Langlie Jal Federal No. 1 consisting of the NE/4 Section 8, T-25-S, R-37-E.

Three copies of a plat showing the location of the proposed well and gas spacing unit are enclosed.

Copies of this application and plat have also been sent to all offsetting operators. A list of these operators is as follows:
