Since well was re-completed to OH 3705-3757 on August 20, 1981, production has decreased until it is no longer economical to produce. In an effort to make the well economical to produce we propose to perform the following remedial work.

- 1) Rig up well service unit and pull tubing.
- 2) Selectively perforate 3523-3602.
- 3) Acidize and FRAC if necessary.
- 4) Swab test perforations (3523-3602) and open hole (3705-3757).
- 5) Place well on production.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
