

SURFACE USE PLAN
Continental Oil Company, Jack B-30 No. 2
330' FNL and 1725' FEL of Section 30, T-24S, R-37E
Lease LC-032326 b, Lea County, New Mexico

This plan is to accompany "Application for Permit to Drill" the subject well which is located approximately 12 miles on a direct line southeast of Eunice, New Mexico. The following is a discussion of pertinent information concerning possible effect which the proposed drilling of the well may have on the environment of the well and road sites and surrounding acreage. A copy will be posted on the derrick floor so that all contractors and sub-contracts will be aware of all items of this plan.

1. Existing Roads

- A. The proposed well site is 330' FNL and 1725' FEL of Section 30, T-24S, R-37E, Lea County, New Mexico.
- B. Exhibit "A" is a portion of a New Mexico road map showing existing black top roads. Directions to the location (outlined in red on map) from Eunice, New Mexico, travel 11 miles south on Highway 18, turn west through cattleguard and travel .3 mile, turn southeast .2 mile, the new road will be from this point 250' west to the new location.

C.D.E. The access roads are shown on Exhibit "B".

- F. No improvement or maintenance are anticipated for the existing roads.

2. Planned Access Roads

- A. Width and Length: New road required will be 12 feet wide and 250' long. This new road is labeled on Exhibit "B". (staked)
- B. Turnouts: None
- C. Drainage Design: New road will have a drop of 6 inches from center line on each side.
- D. Culverts, Cuts and Fills: None
- E. Surfacing Material: Six Inches of caliche, bladed, watered and compacted.
- F. Gates, Cattleguards, Fences: None

G. The proposed road is staked.

3. Location of Existing Wells

See Exhibit "C".

4. Location of Existing and/or Proposed Facilities

A. Tank Batteries: If one is required it will be erected on the well pad.

B. Producing Facilities: No additional producing facilities are required.

C. Oil Gathering Lines: None

D. Other Lines: The Gas Company will tie-in at the wellhead.

E. Rehabilitation: Pits will be backfilled and leveled as soon as practical to original condition. Commencement of rehabilitation operations will immediately follow removal of drilling and completion equipment from location and rehabilitation of the surface is planned to be completed within 45 days from commencement.

F. Power Lines: None required.

5. Water Supply

The water will be hauled from Eunice, New Mexico.

6. Source of Construction Materials

A. Caliche for surfacing the new road and the well pad will be obtained from an existing pit in the SE/4 of Section 18, T-24S, R-37E, as shown on Exhibit "B".

B. Caliche to be purchased from Fred B. Cooper by the dirt contractor.

C. The caliche to be hauled over existing roads shown on Exhibit "B" following same route as outlined in directions to location.

7. Methods for Handling Waste Disposal

Waste Disposal - Well cuttings will be disposed in reserve pit. Barrel trash containers to be in accessible location within drill site area during drilling and completion procedures. All detrimental waste will be hauled away, burned or buried with a minimum cover of 24" of dirt. See Exhibit "D" for location of pits. If well is productive, maintenance waste will be placed in special trash cans and hauled away periodically. Any produced water will be collected in tanks until hauled to an approved disposal system, or separate disposal application will be submitted to the survey for appropriate approval.

8. Ancillary Facilities

None

9. Well Site Layout

Exhibit "D" shows the relative location and dimensions of the well pad, mud pit, reserve pit, trash barrel, etc. The reserve pit will be lined with plastic. The pad and pits are staked.

10. Plans for Restoration of Surface

Pits will be backfilled and leveled as soon as practical to original condition. Commencement of rehabilitation operations will immediately follow removal of drilling and completion equipment from location and rehabilitation of the surface is planned to be completed within 45 days from commencement.

11. Other Information

A. Terrain: Low rolling sand hills. See Exhibit "B", topographic map of area.

B. Soil: Sandy.

C. Vegetation: Mesquite, Shiner, Grass.

D. Surface Use: Grazing.

E. Ponds and Streams: None within one mile.

F. Water Wells: .5 mile east.

G. Residences and Building: None within one mile.

H. Arroyos, Canyons, Etc.: None

I. Well Sign: Sign identifying and locating well will be maintained at drill site with the spudding of the well.

J. Open Pits: All pits containing mud or other liquids will be fenced.

K. Archaeological Resources: None observed.

12. Operator's Representative

Field personnel who can be contacted concerning compliance of this Surface Use Plan are as follows:

Production and Drilling
C. R. Paschal, D. A. Sowers, E. L. Oshlo, or L. P. Thompson
1001 North Turner
Hobbs, New Mexico 88240
Phone: 393-4141
