

3. Location of Existing Wells

See Exhibit C.

4. Location of Existing and/or Proposed Facilities

- A. Tank Batteries: A tank battery is located approximately 0.25 mile SE of the location near Jack B-17 No. 6. John Yuronka's battery is 3/4 mile SE of the location.
- B. Producing Facilities: No new producing facilities will be required.
- C. Oil Gathering Lines: Flowlines will lay, not buried, alongside road right-of-way.
- D. Other Lines: An electrical distribution line will be constructed on 330' spans as shown in Exhibit E. Material and construction schematics are included.
- E. Rehabilitation: Pits will be backfilled and leveled as soon as practical to original condition. Commencement of rehabilitation operations will immediately follow removal of drilling and completion equipment from location. Rehabilitation of the surface is planned to be completed within 45 days from commencement.

5. Water Supply

Water will be hauled from Jal, New Mexico.

6. Source of Construction Materials

Caliche will be hauled from a pit located in the NW/4 of the NW/4, Sec. 17, T-24S, R-37E. See Exhibit B for location of the pit.

7. Methods for Handling Waste Disposal

Waste Disposal: Well cuttings will be disposed in reserve pit. Barrel trash containers to be in accessible locations within drill site area during drilling and completion procedures. All detrimental waste will be hauled away, burned or buried with a minimum cover of 24" of dirt. See Exhibit "D" for location of pits. If well is productive, maintenance waste will be placed in special trash cans and hauled away periodically. Any produced water will be collected in tanks until hauled to an approved disposal system, or separate disposal applications will be submitted to the survey for appropriate approval.

8. Ancillary Facilities

None required.
