Jal, NM 88252

SUBJECT: Meador A SWD #1-G in 10-25-36

Dear Carmen:

The annulus pressure test of the above well was completed November 23, 1985, and the well appears to be mechanically sound as of this date. Also, the surface condition of the facility is satisfactory.

As provided by Division Order R-7935, approving this well for disposal, the District Supervisor has the authority to approve disposal of water other than that produced from the SR formation into the above referenced disposal well. You may consider this as approval for you to begin to accept water from leases other than those specified in Order R-7935.

Very truly yours,

OIL CONSERVATION DIVISION

  
Jerry Sexton  
Supervisor, District I
