SUBJECT: Yearly Annulus Pressure Test Required  
Meador A SWD #1-G 10-25-36

Dear Mr. Orozco:

As per our conversation of August 1, 1985, you will be required to pressure up on the tubing/casing annulus yearly in order to assure us of the integrity of your surface casing since this well is completed without a production casing string from 1633 feet to the surface. In the event of a tubing/packer failure should your surface casing develop a leak, we do not feel the fresh water would be protected. For this reason we feel the yearly annulus pressure test is justified.

Very truly yours,

OIL CONSERVATION DIVISION
