

MULTI-POINT SURFACE USE AND OPERATIONS PLAN

ALPHA TWENTY-ONE PRODUCTION COMPANY
EL PASO TOM FEDERAL NO. 1
330 FWL & 330 FNL Section 33
T-25-S, R-37-E
LEA COUNTY, NEW MEXICO
LEASE NO. LC 054667

This plan is submitted with the Application for Permit to Drill the above described well. The purpose of the plan is to describe the location of the proposed well, the proposed construction activities and operations plan, the magnitude of necessary surface disturbance involved, and the procedures to be followed in rehabilitating the surface after completion of the operation so that a complete appraisal can be made of the environmental effects associated with the operation.

1. EXISTING ROADS:

Exhibit "A" is a portion of a United States Geological Survey Topographic Map covering a part of T-25-S, R-37-E, Lea County, New Mexico, which shows the location of the proposed well as staked. Also included on Exhibit "A" are all nearby New Mexico State Highways (SH-18) as well as all existing roads within a one-mile radius of the proposed well site and the planned access road.

To reach the proposed well, first drive eight-tenths (0.8) miles south on SH-18 from the intersection of SH-128 and SH-18 in Jal, New Mexico. Then turn left onto a blacktop county road (turns into a caliche road) and drive 0.65 miles. Next, turn right onto a lease road and drive south one (1.0) mile to the drill site.

2. PLANNED ACCESS ROADS:

- A. Length and Width: The required new access road will be twelve (12) feet wide and approximately 200 feet long. The new road is labeled and color coded red on Exhibit "A". The Center line of the proposed new road from the edge of the well site to the existing access road has been staked and flagged with the stakes being visible from one stake to the next.
- B. Surfacing Material: Six inches of caliche, water, compacted and graded.
- C. Maximum Grade: Three (3) percent.
- D. Turnouts: No new turnouts required.
