

- C. Formation Water and Oil: Although not anticipated, any produced formation water will be disposed of in the drilling pits. Oil produced from the well during tests will be stored in test tanks until sold.
- D. Human Waste: All current laws and regulations pertaining to the disposal of human waste will be complied with.
- E. Trash, Waste Paper, Garbage, and Junk: All trash, waste paper, garbage, and junk will be buried in a trash pit located adjacent to the reserve pit and will be covered with a minimum of 24 inches of dirt. Before burial, the waste material will be contained to prevent scattering by the wind. The location of the trash pit is shown in Exhibit "C".
- F. Trash Burial: All trash and debris will be buried or removed from the well site within thirty (30) days after finishing well completion operations.

8. ANCILLARY FACILITIES:

None required.

9. WELLSITE LAYOUT:

- A. Wellsite Boundaries: The boundaries of the wellsite have been staked and flagged.
- B. Rig Components: Exhibits "C" and "D" show the relative location and dimensions of the well pad, mud pits, reserve pit, trash pit, and location of major rig components.
- C. Wellsite Levelling: Only minor levelling of the wellsite will be required. No cuts or fills will be necessary.
- D. Pit Lining: The reserve pit will be plastic lined.

10. PLANS FOR RESTORATION OF THE SURFACE:

- A. Equipment Removal: After the finishing of drilling and/or completion operations, all drilling equipment and other material not needed for routine operations will be removed from the wellsite. Pits will be filled and the location cleaned of all trash and junk thus leaving the wellsite in an aesthetically pleasing condition.
- B. Unguarded Pits: Any unguarded pits containing fluid will be fenced until they are back-filled.
- C. Well Abandonment: Upon abandoning the proposed well, the surface restoration will be in accordance with the agreement with the surface owner. As stated above, the pits will be filled and the location will be cleaned. The pit area,
