Pressure test for TA

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

9-29-95

Pressure up on casing to 550 PSI, and monitor for 30 minutes on pressure recorder. At the end of the test the pressure was 530 PSI, and the bradenhead never did anything.

Lanexco, Inc. respectfully requests this well be allowed to continue as TA'd status due to the continued low prices we are paid for oil and gas. This well could be a candidate for a workover, and be recompleted, or possibly converted into a salt water disposal. But if the well is plugged, this would cause the wellbore to be lost. TA APPROVED FOR 12 MONTH PERIOD
