MEMO TO: Mike Stogner  
FROM: Jerry Sexton  
RE: Doyle Hartman  
E. C. Winters  
160 acre NSP NE/4 Sec. 18, T25S, R37E  
Jalmat Pool

We have examined the files of the Hartman Winters #1-B & #2-H, and the Texaco Producing Inc. South Langlie Jal Unit #12-B & #17-H and find that the Hartman wells are perforated in the Upper Yates, at least 150' above the Texaco Unit wells which are producing from the SR.

Texaco is aware that Hartman has the Jalmat gas rights in this area. We will make notation in our file that the Hartman Winters #2 should remain classified as a gas well.

If you have further questions, please call me.
