Re: Bates well No. 3
Section 20, T-25-S, R-37-E
Lea County, New Mexico

Mr. Sexton:

In regard to your letter of August 24, 1981 concerning total depth of subject well I have enclosed a revised C-101 showing proposed depth of 3340. We would like this C-101 to replace the C-101 submitted on August 21, 1981 showing a proposed depth of 3500.

We hope this proposed depth will meet with your approval. If the formation runs deeper than anticipated and more hole is deemed to be necessary we will submit a C-103 requesting a change in the total depth.

Thank you for your consideration in this matter.

Very truly yours,

Larry A. Nermyr
