We propose to drill a Jalmat (Yates) well with the bottom hole location 2380 FSL and 260 FEL of Section 19, T-25-S, R-37-E. The surface at this location is occupied by houses. We propose to locate the rig on a vacant lot 1160 FSL and 1610 FEL of Section 19, T-25-S, R-37-E and deviate the hole to bottom hole location 2380 FSL and 260 FEL of Section 19, T-25-S, R-37-E at a true vertical depth of 3550. The total depth of the well will be 3550 true vertical depth and will be located 2380 FSL and 260 FEL of Section 19, T-25-S, R-37-E. A directional survey of the entire well bore will be made when total depth is reached. A hearing was held November 22, 1983, for approval to deviate this well. From the base of the surface pipe through the running of production casing, the well will be equipped with a 3000-psi double ram BOP system.

NOTE: (1) Any gas produced from the proposed well has previously been dedicated to El Paso Natural Gas Company.
