13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Reference is made to INC KAH-AO1-01

Saga respectfully requests a renewal of the existing order maintaining the wellbore as temporarily abandoned and an extension for restoring mechanical integrity to August 1, 2001. This well has value as a producer at a later date as part of the waterflood expansion that has been proposed as a result of a geological study recently completed. The well failed its downhole mechanical integrity test even though it has a CIBP set above the perforations. Work to find and repair the source of the pressure leak-off noted on the April 2001 pressure test will be done this month. Work to return this well to an active producing status as part of the water flood expansion project is slated for sometime next year.

By existing date, perform
a successful MIT.
