OFFSET JALMAT (GAS) OPERATORS
Jack A-20 No. 11
E/2 Section 20, T-24-S, R-37-E
Lea County, New Mexico
(320 Acres)

We respectfully request your prompt approval of our administrative request before the New Mexico Oil Conservation Division to combine the two existing non-standard 160-acre proration units, NE/4 Section 20 (NSP-964) and SE/4 Section 20 (NSP-965) into a single 320-acre proration unit comprising the entire E/2 of Section 20, T-24-S, R-37-E, Lea County, New Mexico. The above mentioned 160-acre Jalmat (Gas) proration units are dedicated to our Jack A-20 No. 9 well (A-29-24S-37E) and Jack A-20 No. 11 (O-20-24S-37E) which were recently acquired from Conoco, Inc, et al.

Furthermore, Hartman hereby requests your prompt approval of our application to simultaneously dedicate our newly proposed Jack A-20 No. 11 well to be located 2180' FSL and 1980' FEL (J) Section 20, T-24-S, R-37-E along with the previously existing Jack A-20 No. 9 and Jack A-20 No. 10 wells to the combined 320-acre Jalmat (Gas) proration unit consisting of the E/2 Section 20, T-24-S, R-37-E, Lea County, New Mexico.

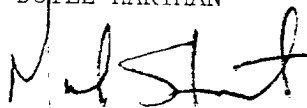

This letter will also serve as your notice of our intention to ultimately qualify our Jack A-20 No. 11 as a Section 103 Infill Well under the Natural Gas Policy Act of 1978.

Since we desire to spud the proposed Jack A-20 No. 1 well in the very near future, please indicate your approval of our requests by signing one (1) copy of this waiver and returning it in the enclosed, stamped, self-addressed envelope at your earliest convenience.

Thank you for your consideration in this matter.

Very truly yours,

DOYLE HARTMAN
