13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work,)\*.

Well is currently producing as a commingled Blinebry/Tubb-Drinkard new well.

We are in the process of having this well's commingled production analyzed (using "fingerprinting" technology) to determine production splits for the two separate pools. This technique will save Texaco the time and money associated with plugback, test and unplugging the well to determine splits.

Submission of this Sundry notice was agreed upon by Tony Ferguson (BLM-Roswell) and Ken Haney (Texaco-Hobbs) 5/15/97.
