13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Install production facilities (tanks, separator, flowlines) to test this well for one to three months in order to evaluate its commercial potential. Landreth took over operations effective September 1, 2002 from OXY USA Inc. All produced liquids will be collected in tanks, with oil being sold under NMOC test allowable procedures. Gas production (estimated at 150-200 mcfpd initially) will be vented during the test period until we can determine if well will justify laying 5 1/2 miles of pipeline to connect to gas market.

Estimated starting date for testing is March 15, 2003
