(Note: Report results of multiple completion on Well  
Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Permit to drill this well was originally granted on August 21, 1974; therefore, the permit would normally expire on November 21, 1974 (90 days) unless operations were commenced. Due to the unusually heavy amount of rainfall in this area, the roads are under water for quite a distance in several places and we have been unable to move a rig and personnel in and out without tearing up the county roads.

We respectfully request that this permit be extended for an additional ninety (90) days, with the permit to expire on February 21, 1975.
