DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

TD 3515'

The well was plugged and abandoned in the following manner: A 25-sack cement plug was placed from 3436 to 3336' to shut off water producing formation. Then hole was filled with heavy mud-laden fluid and 2294' of 7" casing shot off and recovered. A 20-sack cement plug was placed in top of the 7" left in the hole and another 20 sack cement plug was placed in bottom of 9-5/8" casing. 397' of 9-5/8" casing ^{plugged} plug was placed in top of the 13" surface pipe which was left intact. A 4' pipe marker 5' above ground was placed in top of cement, and the ground restored to its original contours. head roustabout

The above work was witnessed by L. L. Martin, Stanolind Oil & Gas Company.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
