17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

This well was shut in December 1, 1970, due to insufficient pressure to produce into sales line. This well is in the Cooper Jal Unit waterflood project and is being retained for possible oil production from the Jalmat zone or deepening to the Langlie Mattix zone.

No definite timing of possible remedial work has been determined. It is requested that plugging and abandoning of this well be deferred at least two years since the well does have potential value to the waterflood project.

Expires 10/1/75

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
