DATE WORK PERFORMED June 27 POOL Langlie Mattix

This is a Report of: (Check appropriate block) ☐ Results of Test of Casing Shut-off  
☐ Beginning Drilling Operations ☐ Remedial Work  
☐ Plugging ☒ Other Run Tubing & Swab

Detailed account of work done, nature and quantity of materials used and results obtained.

Well has been considered dead for the past several months but when ran measuring line to check for savings, found 750 feet of fluid in hole. Ran tubing and after swabbing for one day, well commenced flowing. Did not feel that well would continue to produce so did not request allowable for same. However, well has flowed continuously since being swabbed off and now feel it may produce indefinitely.
