Gates -26 51 Johns, New Mexico Jan. 1, 1946

Well No. 1 is located 600 ft. from N line and 600 ft. from E line of sec. 25

37/4 Sec. 26 24S 36E N. M. P. M.
(4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Cooper Lea New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

This well has been plugged and abandoned using the following procedure:

The well had previously been plugged back to 3000' with cement. Then recovered 2315' 11" of 5-1/2" casing and plugged back inside the 5-1/2" casing with 12# mud and set a cement plug at the top of the 5-1/2" casing left in the hole. Then plugged back to the bottom of 7-5/8" casing set at 1673' with 12# mud and set a cement plug at the bottom of this casing. Recovered 1400' 5" of 7-5/8" casing and plugged back inside this casing with 12# mud and set a cement plug at the top of the 7-5/8" casing left in hole. Then plugged back with mud to the bottom of the 10-3/4" casing set at 219' and plugged back to surface with cement. A marker was erected and the location was restored to its original condition.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
