Gentlemen:

The Commission has received Form C-103, Final Plugging Report, on your well the Woolworth #1, plugged in July, 1973, and since that date we have not received any notice on the status of surface clean up of this lease.

If this lease has not been cleaned up, the Commission strongly feels that four years is an unjustifiable length of time to get this location in shape, so please do so immediately and notify us when work is completed. If the lease has already been cleaned up, please notify us so we can inspect this location and release your plugging bond.

Sincerely,

OIL CONSERVATION COMMISSION
