

NEW MEXICO STATE LAND OFFICE  
OFFICE OF THE STATE GEOLOGIST  
SANTA FE, NEW MEXICO

## MISCELLANEOUS REPORTS ON WELLS

Submit this report in duplicate to the State Geologist or proper Oil and Gas Inspector within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of water shut-off, result of abandonment of well, and other important operations, even though the work was witnessed by the State Geologist or Oil and Gas Inspector. Reports on minor operations need not be signed and sworn to before a notary public, but such operations should be witnessed by an Oil and Gas inspector if possible.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS	<b>XX</b>	REPORT ON DEEPENING WELL	
REPORT ON RESULT OF SHOOTING WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF WATER SHUT-OFF		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF ABANDONMENT OF WELL			

Bartlesville, Oklahoma

1. The first part of the document discusses the importance of maintaining accurate records of all transactions.

2. It is essential to ensure that all data is entered correctly and that the system is updated regularly. This helps to prevent errors and ensures that the information is current and reliable.

3. The second part of the document outlines the various methods used to collect and analyze data. These methods include surveys, interviews, and focus groups. Each method has its own strengths and weaknesses, and it is important to choose the one that best suits the needs of the study.

4. The third part of the document discusses the importance of ethical considerations in research. Researchers must ensure that they are following all applicable laws and regulations, and that they are protecting the privacy and confidentiality of their participants.

5. Finally, the document concludes by emphasizing the importance of transparency and accountability in research. Researchers should be open about their methods and findings, and should be willing to accept criticism and feedback.

6. The fourth part of the document discusses the importance of data security. Researchers must ensure that their data is stored securely and that it is protected from unauthorized access. This is especially important when dealing with sensitive information.

7. The fifth part of the document discusses the importance of data sharing. Researchers should be encouraged to share their data with other researchers, as this can help to advance the field and to ensure that the data is being used in the most effective way possible.

8. The sixth part of the document discusses the importance of data archiving. Researchers should ensure that their data is archived properly, so that it can be accessed in the future if needed.

9. The seventh part of the document discusses the importance of data backup. Researchers should ensure that their data is backed up regularly, so that it can be recovered in the event of a disaster.

10. The eighth part of the document discusses the importance of data validation. Researchers should ensure that their data is accurate and that it is free from errors.

11. The ninth part of the document discusses the importance of data analysis. Researchers should ensure that they are using the appropriate statistical methods to analyze their data, and that they are interpreting the results correctly.

12. The tenth part of the document discusses the importance of data reporting. Researchers should ensure that they are reporting their findings in a clear and concise manner, and that they are providing enough detail for others to be able to replicate the study.

13. The eleventh part of the document discusses the importance of data storage. Researchers should ensure that their data is stored in a secure and accessible location, and that it is backed up regularly.

14. The twelfth part of the document discusses the importance of data management. Researchers should ensure that they are keeping track of their data and that they are organizing it in a way that makes it easy to find and use.

15. The thirteenth part of the document discusses the importance of data sharing. Researchers should be encouraged to share their data with other researchers, as this can help to advance the field and to ensure that the data is being used in the most effective way possible.
