The Texas Company
I. B. Ogg "A"
N.M.F.M.
Dec. 35

Completed during January 1935 Finished during March 1935
The summary on this page is for the condition of the well at the date
Date Wink, Texas, 3-18-35
The Division Superintendent

SAVING THE WORLD'S RAIN FOREST

well drilled in using the pressure method, from 3753' to 3786'.
samples, fluid and pressure curve the pay was from 3765' to 3786'.
well gauged flowing at rate of 200 barrels per hour with 5,070,000
cubic feet gas. Gas oil ratio 1050 cubic feet per barrel.
Drill stem test 37653' from 3700' to 3763' - 45 minutes. Result
100,000 cubic feet gas and 5 joints of mud.

It is of the greatest importance to have a complete history of the well. If there were any changes made in the casing, state fully, and if any casing was added or removed from the well, state its size, location, and number of joints. If logs or bridges were built in the well, state their location, and number of joints. If there were any changes made in the casing, state fully, and if any casing was added or removed from the well, state its size, location, and number of joints.
