Re: #1 McKinney
C Ne Ne 36-24S-36E
Lea County, New Mexico

Gentlemen:

On December 1, 1948, we submitted Form #C-102 stating that we were going to set 300 ft. of 10 3/4" surface pipe circulating cement to the surface on the above described well. On December 7, 1948, we submitted Form #C-103 stating that we had set 298 ft. of 10 3/4" surface pipe circulating cement to the surface on the #1 McKinney. We also stated that we tested this cement job with 1,000 lbs. of pressure and found the cement job to be O. K.

We wish to advise your office that we are now drilling the #1 McKinney below surface pipe and that this drilling operation commenced March 5, 1949.

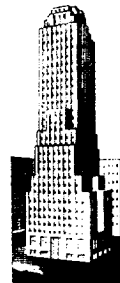

If you will recall, this is the well on which we filed an amended Form #C-101 as there was an error in the staking of the location. We completed the #1 Van Zandt located C Ne Se 25-24S-36E before starting this #1 McKinney.

Yours very truly,

J. T. Paddleford, Geologist
