Figure 1. The effect of the number of trials on the number of correct responses. The number of correct responses was significantly higher for the 10-trial condition than for the 5-trial condition. Error bars represent the standard error of the mean.

Figure 1: A schematic diagram of the proposed system. The system consists of a user, a server, and a database. The user sends a request to the server, which then queries the database. The database returns the results to the server, which then sends them back to the user.
