

III.

INJECTION WELL DATA SHEET (Page 2)

1. The name of the injection zone is the Penrose Sand of the Queen formation.
2. The name of the field is the Langlie Mattix (Seven-Rivers Queen Grayburg).
3. These wells were not drilled for water injection service but were originally Langlie Mattix Pool oil wells. The G. H. Mattix Federal, Well No. 2 was completed on February 21, 1951; Well No. 5 was completed on November 15, 1961; and, Well No. 6 was completed on November 30, 1961. No records of the Permit to Drill dates are available.
4. These wells have never produced from any zone except the Penrose Sand from 3309' to 3646'.
5. The underlying oil and gas pools in this area are as follows:

<u>Pool</u>	<u>Average Producing Depth</u>	<u>Township</u>	<u>Range</u>
Teague Blinebry	5300'	23-S	37-E
Teague Abo	6700'	23-S	37-E
Teague Devonian	7300'	23-S	37-E
Teague Simpson	9200'	23-S	37-E
Teague Ellenburger (Depleted)	9500'	23-S	37-E
