Dear Sir:

Under the provisions of Commission Order No. R-520, Rules 3 and 5(b) delegating the Secretary of the Commission authority to grant exceptions to the requirements of Rule No. 2 and No. 5(a) without notice and hearing for an unorthodox location and non-standard gas proration unit respectively, Stanolind Oil and Gas Company hereby applies for an exception to the aforementioned two rules for completing C. Myers "B" No. 2, Jalmat Field.

In support of the above application the following data are furnished:

C. Myers "B" No. 2 is located 330' from the South and West Lines of Section 4, T-24-S, R-37-E. Original completion on 6-8-37 was in the Langlie-Mattix Field from the interval 3409' to 3570'. After the well became non-commercial in 1953, producing at the rate of 1 BOPD, application was made by Form 9-331A dated 11-5-53 to recomplete in the Langmat gas pool. Approval was granted 11-20-54. Subsequently the well was plugged back to 3385, perforated at various intervals from 2790 to 3294 and acidized with 11,000 gallons. Production amounted to only 23 MCF per day. Consequently, the well was shut in on 2-21-54. Subsequent to Order No. R-520 which delineated the horizontal and vertical limits of the Jalmat Field, another attempt was made to obtain commercial gas production. This proposal was submitted in
