

Core #3 continued

3522 $\frac{1}{2}$ -3526	Gray to brown, dolomitic, medium grained sandstone; odor; bleeding oil; 24 $\frac{1}{2}$ -25 missing
3526-3530	Gray, tight, medium crystalline, dolomite becoming slightly sandy and stained at base; some core missing
3530-3530 $\frac{1}{2}$	Brown, medium crystalline, very sandy dolomite; odor; stain
3530 $\frac{1}{2}$ -3533	Gray, dense, slightly shaly, medium crystalline dolomite; 31 & 32 possibly missing
3533-3536	Brown, slightly sandy, finely crystalline dolomite; bleeding oil; some core missing
3536-3540	Gray, shaly, dense, finely crystalline dolomite; some core missing
3540-3543	Brown, sandy, medium crystalline dolomite, odor, bleeding oil; some core missing
3543-3550 $\frac{1}{2}$	Brown to gray, slightly shaly, tight, finely crystalline, fractured dolomite; slight bleeding along horizontal fractures; strong bleeding from 3549-51 due to being core coarsely crystalline
3550 $\frac{1}{2}$ -51	Brown-black, finely crystalline, shaly dolomite
3551-3558 $\frac{1}{2}$	Tan & gray, very finely crystalline dolomite with intermittent black shale streaks, some scattered vuggy porosity
3558 $\frac{1}{2}$ -3564	Brown, slightly shaly, dolomitic sandstone & sandy dolomite interbedded; dolomite medium crystalline and sandstone medium grained; strong odor; some core missing

Core #4

Depth Cored:	3564 - 3621'
Recovered:	57'
3564-3565	Black, shaly, slightly sandy, medium crystalline dolomite; good odor
3565-3569	Gray, shaly, medium crystalline dolomite
3569-3570	Brown, medium grained, dolomitic sandstone; strong odor
3570-3572 $\frac{1}{2}$	Tan, tight, lithographic dolomite; stylite at 71.5
3572 $\frac{1}{2}$ -3577 $\frac{1}{2}$	Brown, very sandy, shaly dolomite
3577 $\frac{1}{2}$ -3582 $\frac{1}{2}$	Black, very shaly, medium crystalline dolomite
3582 $\frac{1}{2}$ -3584	Brown, shaly, dolomitic sandstone; odor; most of interval missing
3584-3586	Tan-gray, fractured, lithographic dolomite; oil in fractures; stylite at 83.5
3588-3590 $\frac{1}{2}$	Black, sandy shale
3590 $\frac{1}{2}$ -3594 $\frac{1}{2}$	Black, very shaly, sandy, medium crystalline dolomite; odor
3594 $\frac{1}{2}$ -3595	Black, limy shale
3595-3602	Tan-gray, fractured, finely crystalline dolomite; odor; various stylites & thin, black shale streaks in interval
3602-3603	Gray, sandy dolomite; sand very fine grained; no porosity indicated
3603-3613 $\frac{1}{2}$	Black, finely crystalline dolomite; considerable oil bleeding from vuggy porosity at 3606-07 and 08-13 $\frac{1}{2}$
3613 $\frac{1}{2}$ -3621	Gray, fractured, finely crystalline dolomite; few black shale streaks; scattered bleeding from horizontal fractures.
