Total Depth, 1390' - Anhydrite and Shells. 8-5/8" casing set and cemented at 1206' with 250 sacks.

Due to water encountered between 1242' and the present depth, which had not been anticipated, we found it necessary to set and cement 1383' of 7" OD 20# casing at 1390' with 29 sacks cement. Completed cementing at 3:35 AM, 2-23-44, and anticipate drilling plug and testing after approximately 48 hours. This string was run with a left-hand nipple 396' off bottom, so that it could be parted and left as a 7" liner cemented in the hole to shut off water.
