Re: Application to Dually Complete R. Olsen Oil Company's <u>Court-</u> land Meyers #1. Les County, New Mexico.

IN UL O

July 17:

A. S. S. L.A.

New Mexico 011 Conservation Commission P. 0. Box 871 Santa Fe, New Mexico

Gentlemen:

By this letter of application, the R. Olsen Oil Company wishes to state the following:

(a) The R. OLSEN OIL COMPANY is now making perparations to drill Courtland Meyers #1 at a location 1980' from the South line and 1980' from the East line of Section 6, T 248, R 37E. The Courtland Meyers lease includes the SE/4 of Section 6, T 248, R 37E and the SW/4 of Section 5, T 248, R 37E. The total depth, horizon tops, casing point, and zone to be perforated as shown herein are based on geological and engineering data and on subsurface information obtained from offset and near-by wells drilled through the objective pay mones. These points may change only slightly, dependent upon the position of the structure as encountered by this well. The attached Exhibit "A" shows the location of this well on the R. Olsen Oil Company Courtland Meyers lease together with the location of offset wells.

(b) The well has a projected depth of approximately 3620'. Seven inch casing will be set at approximately 3460' and cemented with 350 sacks of cement.

(c) The applicant proposes to dually complete the well in the following manner:

- (1) Perforate the 7" casing within the approximate interval of 2980" to 3180" opposite the Yates gas some in the Langmat Gas Peol. The exact interval to be perforated will depend upon the porosity of the some and the peint at which the Yates gas pay is encountered.
- (2) Set a production type packer at approximately 3300' to separate the two pay zones.
