

**ARCO Oil & Gas Company
Central District Drilling**

**Internal Correspondence
Midland Texas**

Date: September 26, 1989

Subject: Jim Camp # 2
Squeeze Jalmat Zone

From/Location: M. W. Gore MIO 351

Telephone: 688-5678

To/Location: R. S. Prentice MIO 729

Attached are the Cost estimate and wellbore schematics for the subject well. Below is a brief description of the work to be performed:

1. Pull CA
2. Set CIBP to isolate open hole interval and squeeze cement perforations.
3. Drill out and test. Clean out to TD and acidize open hole interval (w/ 3000 gals NEFEA)
4. Rerun CA as single pumping well from open hole.

ould be added

If you need any additional information please call.
