Hobbs, New Mexico 88240

REF: NSP 704
Jalmat Gas Proration Unit
Jim Camp WN Lease

Dear Mr. Stogner:

ARCO Oil and Gas Company is writing to inform you that it intends to recompleate the Jim Camp WN Well #3 (located 1980' FSL and 660' FWL of Section 6, T-24S, R-37E, Lea County, New Mexico) into the Jalmat Gas Pool and produce it from an existing Jalmat gas proration unit, which consists of the SW/4 NW/4 and W/2 SW/4 of Section 6. This proration unit was approved by Division Order NSP 704 for the Jim Camp WN Well #2. The Jalmat zone of the Jim Camp WN Well #2 was abandoned in January 1990. The Jim Camp WN Well #3, which is scheduled for recompleation into the Jalmat Gas Pool from the Langlie Mattix Oil Pool, is in a standard location for this proration unit.

Attached is a C-102 form identifying the Jim Camp WN Well #3 and the Jalmat gas proration unit. If you need further information, please call me at (915) 688-5446.

Sincerely,

David K. Newell
Senior Operations/Analytical Engineer
