SUBJECT: Application for Dual  
Completion C. Meyers  
"B" No. 5, Langlie-  
Mattix Oil Field,  
Langmat Gas Field.

New Mexico Oil  
Conservation Commission (3)  
Santa Fe, New Mexico

Gentlemen:

Stanolind Oil and Gas Company hereby files application for the dual completion of C. Meyers "B" No. 5 located 1980' from the south and west lines of Section 9, T-24-S, R-37-E, Lea County, New Mexico. This well is now completed in the lower Seven Rivers and Queen formations from 3265' to 3610' in the Langlie-Mattix Field. The applicant plans to perforate the Yates and Seven Rivers formations from approximately 3200' to 2700' for gas in the Langmat Gas Pool. Segregation of the production from the two producing intervals will be accomplished by employing a packer set between the perforations and open hole section.

As required by Rule 112-4, the following are attached:

- (1) A plat showing the location of all wells on applicant's lease, and all offset wells on offset leases.
- (2) A sketch showing the manner and method of applicant's proposed dual completion.
