DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill the above well with rotary tools to an approximate depth of 7890 and set casing as follows:

Size of Hole	Size of Casing	Depth	Cement
17-1/2"	13-3/8"	300	350 sacks neat circulated to surface.
11"	8-5/8"	3850	125% of volume (based on Caliper Survey) of 4% gel to bring cement above salt section followed by 100 sk. neat.
7-7/8"	5-1/2"	7890	125 sk. neat or larger amounts as required to cover all indicated pays.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
