## OIL CONSERVATION COMMISSION HOBBS, NEW MEXICO

XXX 1980

Sept. 21, 1964

Humble Oil & Refining Co. Box 2100 Hobbs, New Mexico

## Gentlemen:

This office is in receipt of certain forms covering the completion of your New Mexico State "AB" Well No. 2 located in Unit H of Section 16, T-24-S, R-37-E, Fowler-Ellenburger Pool. Form C-103 covering the setting and cementing of the 4½" casing indicates a cement top at 5800', while your Notice of Intention to Drill states that cement will be circulated back into the 9 5/8" casing set at 4454'. This incomplete cementing leaves three possible pools in communication in the annulus of your 9 5/8-4 1/2. These pools are the Fowler-Paddock Gas Pool at around 4800', the Fowler-Lower Paddock Gas Pool at around 5160', and the Fowler Blinebry Oil Pool at around 5400'.

Please explain by letter why the cementing procedure was changed, and also explain how we can be certain that no communication will exist between the three pools not covered by cement.

Yours very truly,

OIL CONSERVATION COMMISSION

Joe D. Ramey Supervisor, District 1

JDR/mc
