Re: East Eumont Unit #2-C

2030/W & 450/N

27-19-37

Ninety days have elapsed since approval of Commission Form C-101, Notice of Intention to Drill, for the subject well. No progress report (Form C-103) has been received. Therefore, Commission approval of Form C-101 is hereby CANCELLED.

Very truly yours,

OIL CONSERVATION COMMISSION

  
Joe D. Ramay  
Supervisor, District 2

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the situation.

1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms of the problem and determining the scope of the problem. Once the problem has been defined, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes. Once the causes have been identified, the next step is to develop a plan of action. This involves identifying the steps that need to be taken to solve the problem and determining the resources that will be needed to implement the plan. Once a plan of action has been developed, the next step is to implement the plan. This involves carrying out the steps that have been identified in the plan and monitoring the progress of the implementation. Finally, the last step in the process is to evaluate the results of the implementation. This involves determining whether the problem has been solved and whether the resources have been used effectively.

(FOI-9) was released to Justice while badge even says "NEW YORK" badge on it. This badge was not filed as evidence in the case. The badge was found in the car of the defendant, a 1967 Ford Mustang. (The badge was found in the car of the defendant, a 1967 Ford Mustang.)
