17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

The New Mexico Oil Conservation Commission has previously approved Mesa's application (dated October 22, 1973, but expiring January 24, 1974) for the Gantt #1 located 660' FSL & 1980' FEL Section 12. The well was originally projected to 12,100' for a Morrow test but has been altered to 11,600' for a Strawn test. A reduction in acreage dedication (from 320 acres to 160 acres) in conjunction with recent drilling in the area, prompted a change in the surface location to 555' FSL & 765' FEL of Section 12.

The first location had been leveled and caliched. All caliche will be removed and used on the current location. Also, topsoil from the current location will be transported to the abandoned location. The original location will be returned to its natural state.

18. I hereby certify that the information above is true and complete to the best of my knowledge and bellef.
