Wichita Falls, Texas 76308

Gentlemen:

Your application to drill the Aztec State No. 2 was approved with the condition that the 4½" casing have the cement brought back to the base of the salt and cemented from the top of the anhydrite to the surface casing.

The Vacuum area has experienced water encroachment into the salt section and to prevent migration of this water into other formations, the above cementing procedure is required.

If any additional information is required on this matter, please contact us.

Yours very truly,

OIL CONSERVATION COMMISSION
