

FLORISTICS

The local plant community is dominated by Andropogon gerardi, Aristida divaricata, Agropyron trachycallum, Muhlerbergia torreyi, Yucca spp., Quercus havardii, Perospis juliflora and Gutierrezia sarothrae.

CULTURAL RESOURCES

The archaeological reconnaissance of this area revealed no visable signs of cultural resources.

RECOMMENDATIONS

ACA recommends clearance for the proposed access right-of-way and drill location and suggests that construction proceed without modification of existing plans.
