

Proposed Development Plan for Surface Use

Amoco Production Company's Myers "B" Well No. 3, Unit B, 660' FNL X 2130' FEL, Sec. 26, T-24-S, R-36-E, Lea County - (Development Well).

1. Existing roads including location of exit from main highway.

Detailed map showing drillsite location in relation to the nearest town and all existing roads within one mile of the wellsite are shown on Exhibit A. From Jal go north on Hwy. 18 six miles to Jal Cooper Cemetary turnoff. Turn left or west on blacktop road and go 2.5 miles. (Pavement ends at 2.1 miles). Turn south on caliche road 1.15 miles to location. See Exhibit B.

2. Planned access roads.

From the existing caliche road, the new road will go east to the south west corner of the drilling pad. The road will be 12' and 450' long. See Exhibit C.

3. Location of existing wells.

All existing wells within one mile radius are shown on Exhibit D.

4. Location of tank batteries and flow lines.

If the well is commercially productive, the production facilities (i.e. tanks, separators and treaters) will be located on the south east end of the drilling pad. See Exhibit E.

5. Location and type of water supply.

 X Water to be hauled

Both fresh water and brine water will be trucked from Rowland Trucking Company's supply in Eunice, New Mexico.

6. Source of construction materials.

Caliche will be obtained from an existing pit located approximately one mile south of location. See Exhibit B.

7. WASTE DISPOSAL -

- a. Drill cuttings will be disposed of in the reserve pit.
- b. Drilling fluids will be allowed to evaporate in the reserve pit until the pit is dry.
