

Memo

From

MELBA CARPENTER
3/19/79

To Dick

The well listed below was omitted from the Oil Proration Schedule beginning May 1, 1978.

Doyle Hartman
Fowler State #1-L 16-24-37
Langlie Mattix Pool (Gas Well)

I checked the Statistical Report and the well is being carried with an allowable and no cumulative over-production. Since that is the case, we are issuing a supplement assigning an allowable effective March 1, 1979.

Jerry wanted me to call this to your attention so that in case someone notices that the well has not had an allowable for that extended period, it will not be charged with over-production.

If this is not clear, give me a call!
