

(9) Wellsite Layout

- A. Exhibit "D" shows the relative location and dimensions of the well pad, mud pits, reserve pit, trash pit, and major rig components.
- B. Only levelling of the well site will be required. No significant cuts and fills will be necessary.
- C. The reserve pit will be plastic lined.
- D. The pad and pit area has been staked and flagged.

(10) Plans for Restoration of the Surface

- A. After completion of operations, all equipment and other material not needed for operations will be removed. Pits will be filled and location cleaned of all trash and junk.
- B. Any unguarded pits containing fluids will be fenced until they are filled.
- C. Any special rehabilitation and revegetation requirements of the surface management agency will be complied with and accomplished as soon as possible. All pits will be filled and levelled within 90 days of completion or abandonment of the well.

(11) Other Information

- A. Topography: The land surface is arid and gently rolling. From an elevation of 3315' at the well site, the surface slopes toward the Southeast at about 30' per mile.
- B. Soil: The topsoil is sandy.
- C. Flora and Fauna: This area is sparsely covered by sage brush and native grass. Wildlife in the area is mainly rabbits, rattlesnakes, and coyotes.
- D. Ponds and Streams: There are no rivers, streams, lakes or ponds in the area.
- E. Residences and Other Structures: The nearest occupied dwelling is 1 1/2 miles Northeast of the well site.
- F. Archeological, Historical, and Cultural Sites: None observed in the area.
- G. Land Use: Grazing.
- H. Surface Ownership: Well site and proposed new road are on Fee Surface.

(12) Operator's Representative:

The field representative responsible for assuring compliance with the approved surface use and operations plan is:

Dale R. Crockett
