Re: Drilling of Unit Wells No. 52 & 147

Amoco Production Co.
P. O. Box 3092
Houston, Texas 77001

Attn: Mr. S. J. Okerson

Gentlemen:

We have received your inquiry of January 31, 1980 concerning Unit Wells No. 52 and 147 which were proposed for drilling by Getty in 1978 and approved by W.I. Owners of the unit as part of a 12 well program. Ten (10) of these wells were drilled; and these two (2) wells were deferred until a later date due to unsigned royalty interests and poor response from the other producers drilled at that time.

Since that time, the other wells have all achieved significant response; and prospects for obtaining statutory unitization of these small outstanding royalty interests seem much more favorable. A 1980 proposal to continue development of undrilled tracts on this flood unit will be submitted for partner approval in the very near future. This program is to drill ten (10) injectors, six (6) producing wells, and one (1) observation well. A corollary to this proposal is to also drill these two (2) wells which were previously carried-over from 1978.

Yours truly,

Audra B. Cary
